

Efficient and secure automation of the end-to-end procurement process.

Are you looking to:

- Save time and costs by automating manual bid-related processes?
- Collaborate with an ever-increasing base of global suppliers?
- Improve time-to-market by streamlining supplier communication?
- Control the distribution of sensitive bid-related data?
- Gain analytics on supplier communication and effectiveness?

An ever-growing network of suppliers and challenges.

Organizations face a myriad of challenges when attempting to efficiently distribute requests for information, proposal, and quotation (RFx) packages. Time spent compiling and distributing bid information delays the RFx process, diverts resources from high-value activities, and impedes the momentum of product innovation. Physically shipping RFx packages to potential suppliers adds lead time and expense. Email systems lack the security and bandwidth necessary to distribute large bid packages safely.

These factors, along with globalization, increasing pressure to innovate, and supply fluctuations, leave organizations searching for innovative and affordable ways to streamline their procurement activities.

An automated solution for gaining efficiency.

TRUsource is on-demand solution for aggregating and distributing bid content in a secure, auditable, and efficient manner. Available across all connectivity methods and communication protocols, TRUsource allows organizations to establish and automate RFx processes throughout the product lifecycle—from engineering and design to manufacturing and maintenance. TRUsource streamlines RFx data input, questionnaire development, bid compilation and distribution, and supplier management and reporting.

Enabling integration and extension through SaaS.

The TRUsource solution line is part of the Trubiquity community—a software-as-a-service (SaaS) based business process network connecting enterprises across all global communication protocols and standards. Access Trubiquity solutions via an on-demand model—over the internet, anytime, anywhere in the world. Combining the benefits of SaaS and enterprise application extension, Trubiquity integrates organizations and automates critical business processes across the global value chain.

Compelling Benefits

- **Establish bi-directional communication** with suppliers across the globe
- **Reduce time and costs** by enabling immediate, electronic bid delivery and submittals
- **Distribute simple and complex bid data** for supplier viewing including large, complex files
- **Protect critical intellectual property** through user authentication, authorization, and encryption
- **Enable automated transaction logging** and reporting to achieve security and compliance
- **Allow multiple stakeholders to contribute to bids** through built-in workflow processing
- **Keep intellectual property and bid data up-to-date**; ensure version synchronization
- **Leverage supply chain visibility** and decision support capabilities to drive strategic planning

Comprehensive Features

- Automated RFx development, distribution, response tracking, and amendments
- Pre-configured questionnaires to speed supplier response and reporting
- Single repository for communication related to bid compilation, delivery, and responses
- Robust RFx versioning, collaboration, and approval workflows
- Comprehensive user management and access privileges for flexibility and scalability
- End-to-end tracking and visibility of bid-related communication for security and compliance

Integrating, extending. All the time, everywhere. Trubiquity.

Around the globe, thousands of companies trust Trubiquity for critical business data management and process automation. Collaborating across all enterprise systems, business functions, protocols, and geographies, the Trubiquity customer list includes the following leading organizations:

BAE Systems	Ford	Magna
B/E Aerospace	General Motors	MAN
BMW	Honda R&D	Mini
Chrysler	Honeywell Aerospace	Mitsubishi
Daewoo	Johnson Controls	Nissan
Delphi	Mercedes Benz	Pratt & Whitney
