

Collaboration across project teams, organizations, and partner communities.

Are you looking to:

- Improve project management and team collaboration processes?
- Collaborate with employees, customers, and partners across disparate geographies?
- Provide business partners with access to data sitting behind a firewall?
- Improve the quality of data stored across business units and organizations?
- Control and monitor the distribution of sensitive intellectual property?

Communication and knowledge sharing—the ultimate challenges.

On-demand has become a way of life. Business relationships form every minute in every country around the globe—all with the goal of bringing better products to market faster. As project teams become more globally dispersed, the challenges involved with linking team members across company boundaries, firewalls, disparate systems, and geographic locations increase.

Anytime, anywhere collaboration—a simple solution.

TRUUnity is a virtual, federated workspace that enables team collaboration in a secure and interactive setting, regardless of geographic location. Create virtual rooms for specific project teams, business functions, and partner communities, all while managing data views and integrity through comprehensive access controls. By enabling continuous collaboration via multiple communication methods, TRUUnity boosts team communication and productivity while decreasing project completion time, product development and design cycles, and time-to-market.

Enabling integration and extension through SaaS.

The TRUUnity solution line is part of the Trubiquity community—a software-as-a-service (SaaS) based business process network connecting enterprises across all global communication protocols and standards. Access Trubiquity solutions via an on-demand model—over the internet, anytime, anywhere in the world. Combining the benefits of SaaS and enterprise application extension, Trubiquity integrates organizations and automates critical business processes across the global value chain.

Compelling Benefits

- Share and collaborate on critical project data with your extended enterprise
- Reduce time and costs associated with common project communication and management tasks
- Leverage multiple collaboration methods to speed and enhance product development
- Allow anytime, anywhere productivity across your organization and partner base
- Keep intellectual property up-to-date; ensure version synchronization
- Gain auditing and business intelligence insight across all project-related activities

Comprehensive Features

- Automated document routing, issue tracking, meeting coordination, and task management
- Single repository for communication related to specific projects or comprehensive programs
- Dashboard and tree structure views of documents, calendars, issues, announcements, and tasks
- Robust document versioning, check in/out, and approval routing workflows
- Comprehensive user management and access privileges for flexibility and scalability
- Seamless integration with all standard desktop authoring applications (Microsoft Office, PDF, CAD)
- Automatic email alerts for document changes and other important workflow triggers
- End-to-end tracking and visibility of project-related communication for security and compliance

Integrating, extending. All the time, everywhere. Trubiquity.
